Software Craftsperson Intern JD

About Us

We are a company where the ‘HOW’ of building software is just as important as the ‘WHAT.’ We partner with large organizations to modernize legacy codebases and collaborate with startups to launch MVPs, scale, or act as extensions of their teams. Guided by **Software Craftsmanship** values and **eXtreme Programming Practices**, we deliver high-quality, reliable software solutions tailored to our clients' needs.

We thrive to:

- **Bring our clients' dreams to life** by being their trusted engineering partners, crafting innovative software solutions.
- **Challenge offshore development stereotypes** by delivering exceptional quality, and proving the value of craftsmanship.
- **Empower clients to deliver value quickly and frequently** to their end users.
- **Ensure long-term success** for our clients by building reliable, sustainable, and impactful solutions.
- **Raise the bar of software craft** by setting a new standard for the community.

Our Core Values

- **Quality with Pragmatism**: We aim for excellence with a focus on practical solutions.
- **Extreme Ownership**: We own our work and its outcomes fully.
- **Proactive Collaboration**: Teamwork elevates us all.
- **Pursuit of Mastery**: Continuous growth drives us.
- **Effective Feedback**: Honest, constructive feedback fosters improvement.
- **Client Success**: Our clients’ success is our success.

Internship Overview

If you’re a Software Craftsperson who takes pride in clean, test-driven code and believes in Extreme Programming principles, we’d love to meet you. At Incubyte, we’re a DevOps organization where developers own the entire release cycle, meaning you’ll get hands-on experience across programming, cloud infrastructure, client communication, and everything in between. Ready to level up your craft and join a team that’s as quality-obsessed as you are? Read on!

Internship Details

Duration- 6months

Year of Graduation- 2026 or 2027 only

Location- 1 month of onsite training at Pune/Ahmedabad and rest 5 months remote

Stipend- 25k/month

This is a 6 month full time internship starting January 2027 and based on internship performance full time opportunity will be offered.

Full time compensation= 6-8lpa based on performance

What You'll Do

- Write Tests First: Start by writing tests to ensure code quality
- Clean Code: Produce self-explanatory, clean code with predictable results
- AI-Augmented Craft: Use AI coding tools within a disciplined TDD workflow speed and quality together, not traded off.
- Frequent Releases: Make frequent, small releases
- Pair Programming: Work in pairs for better results
- Peer Reviews: Conduct peer code reviews for continuous improvement
- Product Team: Collaborate in a product team to build and rapidly roll out new features and fixes
- Full Stack Ownership: Handle everything from the front end to the back end, including infrastructure and DevOps pipelines
- Never Stop Learning: Commit to continuous learning and improvement

What We're Looking For

- Basic proficiency in **Java**, **RESTful APIs**, **React**, **Ruby on Rails (ROR)**, and **Test-Driven Development (TDD)**.
- A keen interest in learning technologies like **Bootstrap**, **JavaScript**, **HTML5**, **CSS3**, **Python**, and **Angular**.
- Comfort or curiosity around AI-assisted development tools (e.g., Claude Code, GitHub Copilot), used thoughtfully alongside strong testing discipline.
- Foundational knowledge of **object-oriented programming**, **data structures**, **algorithms**, and **software engineering methodologies**.
- Familiarity or willingness to learn **Agile** and **Extreme Programming** methodologies in a continuous deployment environment.
- Curiosity to explore tools and technologies like **web server ecosystems**, **relational DBMS**, **CI tools** (e.g., Jenkins, Hudson, Bamboo), **web frameworks**, **front-end technologies**, **complexity analysis**, and **performance optimization**.

- Basic understanding of **source control**, **bug tracking systems**, and how to write **user stories** or create **technical documentation**.

Benefits

What We Offer

- **Dedicated Learning & Development Budget**: Fuel your growth with a budget dedicated solely to learning.
- **Conference Talks Sponsorship**: Amplify your voice! If you're speaking at a conference, we'll fully sponsor and support your talk.
- **Cutting-Edge Projects**: Work on exciting projects with the latest AI technologies
- **Employee-Friendly Leave Policy**: Recharge with ample leave options designed for a healthy work-life balance.
- **Comprehensive Medical & Term Insurance**: Full coverage for you and your family's peace of mind.
- **And More**: Extra perks to support your well-being and professional growth.

Work Environment

- **Remote-First Culture:** At Incubyte, we thrive on a culture of structured flexibility — while you have control over where and how you work, everyone commits to a consistent rhythm that supports their team during core working hours for smooth collaboration and timely project delivery. By striking the perfect balance between freedom and responsibility, we enable ourselves to deliver high-quality standards our customers recognize us by. With asynchronous tools and push for active participation, we foster a vibrant, hands-on environment where each team member's engagement and contributions drive impactful results.
- **Work-In-Person:** Twice a year, we come together for two-week sprints to collaborate in person, foster stronger team bonds, and align on goals. Additionally, we host an annual retreat to recharge and connect as a team. All travel expenses are covered.
- **Proactive Collaboration:** Collaboration is central to our work. Through daily pair programming sessions, we focus on mentorship, continuous learning, and shared problem-solving. This hands-on approach keeps us innovative and aligned as a team.

Incubyte is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.
